DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 9 is rejected under 35 U.S.C. 102(b) as being anticipated by Inoue (U.S. Patent No. 5,778,117).

Regarding claim 9, Inoue teaches an optical amplifier having an input (reference numeral 5b in Figure 8) for receiving over the first optical path an OTDR probe signal and an output (reference numeral 6b' in Figure 8) through which the OTDR probe signal is directed; and an OTDR data acquisition arrangement (reference numerals 9, 35 in Figure 8) receiving over the first optical transmission path at the output of the optical amplifier (reference numeral 6b' in Figure 8) a returned OTDR signal in which status information concerning a span of the first optical transmission path is embodied and, in response thereto, transmitting an optical signal at a channel wavelength along the second optical path (reference numeral 6b in Figure 8) in which said status information is embodied in digital form.

Allowable Subject Matter

3. Claims 1-8 and 17-24 are allowed.

4. Claims 10-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
